In corporation with Prof. Dr. Cees Wittens and Dr. Rick de Graaf the workshop will take place at the University Hospital Maastricht, Netherlands.

Prof. Dr. Cees Wittens is a world-renowned vascular surgeon who was involved in the development of the sinus-Venous stent. He is the director of the European Venous Centre in Aachen-Maastricht and member of the American and European Venous Forum. Dr. Rick de Graaf is the interventional radiologist at the European Venous Centre and has the most extensive experience with the sinus-Venous stent. Together they implanted approximately 175 sinus-Venous stents successfully in more than 80 patients.

During this workshop they will give you an insight into the therapy of acute and chronic vein diseases. Furthermore they will share their experience in venous stenting.
